

**Intelligence Studies Section Panels at ISA 2017
22-25 Feb 2017 in Baltimore, MD**

See below for the Intelligence Studies Section program at the International Studies Association (ISA) conference, 22-25 February 2017 in Baltimore, Maryland.

The Intelligence Studies Section is one of 30 thematic sections that make up the ISA, has approximately 350 members, and has been sponsoring research about intelligence as a function of government since the mid-1980s. Additional information can be found here:

<http://www.isanet.org/ISA/Sections/ISS.aspx>

This Intelligence Studies Section content (4 straight days...30 panels and roundtables) is one small part of ISA's much larger conference. The full conference program is over 200 pages; find details at the full conference website here: <http://www.isanet.org/Conferences/Baltimore-2017>

As the chair of the Intelligence Studies Section, if you have any questions please contact me at marrinsp@jmu.edu or spm8p@yahoo.com

WEDNESDAY 22 FEBRUARY

CAREER COURSE: Wednesday 8:15 AM-12:15 PM

Intelligence Analysis as Discovery of Evidence, Hypotheses, and Arguments: Connecting the Dots

This course teaches the evidential and inferential issues involved in "connecting the dots" to draw defensible and persuasive conclusions from masses of evidence of all types, in a world that is changing all the time. To facilitate the understanding of these issues and enable the performance of complex analyses, the course also introduces an intelligent analytical tool (Disciple-CD) for evidence-based hypotheses analyses. The course will be taught with many exercises, in a style congenial to the interests of a broad audience, regardless of its prior background and training. It will also discuss how various university or professional development courses may integrate modules with some of the presented topics.

The instructor--Dr. Gheorghe Tecuci--is Professor of Computer Science and Director of the Learning Agents Center (LAC) in the Volgenau School of Engineering of George Mason University (GMU), Member of the Romanian Academy, and former Chair of Artificial Intelligence in the Center for Strategic Leadership of the U.S. Army War College. Because of their limited availability, courses require a separate fee of \$25.00 per attendee. All career course attendees must also be registered for the Annual Convention.
