### Russia's Assassination Pandemic

by Peter C. Oleson

Vladimir Putin has said that the demise of the Soviet Union was “one of the greatest tragedies of the 20th century.”<sup>2</sup> Since assuming power in 2000 he has undertaken a focused, revanchist campaign to restore what he believes should be Russia’s position in the world. Leading a nation that is economically stagnant with limited ability to increase its economic power, suffering from Western sanctions, he has come to believe in a zero-sum approach to international relations – for Russia to become strong, the West must be weakened. This underscores the approach he has undertaken in relations with perceived opponents, foreign countries, and the United States in particular.<sup>3</sup>

Putin has pursued a policy of silencing opponents at home and abroad, spreading chaos internationally,

and conducting a sub rosa conflict against the West across a broad front.

At home, after assuming the presidency in 2000, he quickly subjugated perceived opponents and critics. By 2004 the “freewheeling oligarchs of the 1990s were soon brought to heel.”<sup>4</sup> *Financial Times* Moscow correspondent Catherine Belton, in her new book, states that using “...the ever-present threat of tax fraud charges was part of a process that was gradually turning Yeltsin-era oligarchs into loyal vassals...”<sup>5</sup>

Assassination was too. Today, the remaining oligarchs play to the Kremlin’s tune; none are independent actors; they are extensions of the state. There is no better example than Yevgeny Prigozhin’s network of companies. His Internet Research Agency (IRA) in St. Petersburg is best described as a troll farm spreading disinformation via social media. And his Wagner Group is a mercenary paramilitary company providing Russian fighters to the Assad regime in Syria and Khalifa Haftar’s Libyan National Army in Libya, and security forces throughout countries in Africa.

Even before the breakup of the Soviet Union, KGB leaders and senior members of the Communist Party of the Soviet Union, concerned about the direction of events, moved to preserve their positions as an organization.<sup>6</sup> The KGB’s foreign intelligence elements<sup>7</sup> created vast secret slush funds to ensure its power and ability to continue its operations that were not accountable to the Duma, hidden behind “byzantine layers of complexity.”<sup>8</sup> Much of what the Kremlin was doing was exposed by Sergei Kolesnikov of Rossiya Bank in St. Petersburg (often referred to as “Putin’s Bank”), who defected to the US in 2010 with thumb drives full of data and tape recordings of conversations. His intelligence showed how funds were being siphoned off to, among other places, the British Virgin Islands (BVI) and Panama into Santal Trading, a company referred to as “the safe.”<sup>9</sup> In time, these “black cash” funds totaled in the tens of billions of dollars. The Kremlin and the reorganized security services used its black cash funds for “active measures” overseas to hunt down Putin’s opponents and to “buy off

### Assassinations

Washington Post reporter Jackson Diehl claimed "By some counts, more than a dozen people have been assassinated by Kremlin agents since 2004, while a number of others barely survived attacks."<sup>11</sup> His account is conservative. For dissidents and opponents of Putin, Covid-19 is not the only pandemic they face. [For specific cases see the Appendix, Russian-linked Assassinations and Attempts under Putin, at end of this article.]

The KGB's successor agency, the FSB, and the military GRU have carried out numerous assassinations, often using exotic poisons, such as Dioxin, Gelsemium, Cadmium, Polonium 210, and the nerve agents Sarin and Novichok. Other victims have been shot, supposedly committed "suicide," often by falling off balconies, or suffered "heart attacks." The secrecy surrounding investigations of suspicious deaths in Russia makes it often difficult to accurately determine the cause of death or the circumstances. Any death of a dissident, journalist, political opponent, or critic of Putin, or his closest cronies, needs to be viewed with skepticism.

Russian operatives have carried out numerous assassinations outside of Russia.<sup>12</sup> The UK and Ukraine have witnessed numerous murders of Russian exiles, dissident Chechens, and others. In 2019, Ukraine said it had captured a Russian military intelligence (GRU) hit squad. "Those detained were involved in the attempted murder of an employee of the Ukrainian defense ministry's intelligence service...in Kiev in April," said a spokesperson, adding the group had planted a bomb beneath the man's car which had gone off prematurely, badly injuring one of the accused.<sup>13</sup>

Putin went after several exiled oligarchs and their enablers as well as defectors from the Russian intelligence services in the UK. The list is long, including Alexander Litvinenko, Alexander Perepilichnyy, Boris Berezovsky, Badri Patarkatsishvili, Yuri Golubev, Nikolai Gluskov, and Sergei Skripal. Regarding Skripal,

Gordon Corera of the BBC said "Putin was very upset at the arrest of ten illegals in 2010 [in the US by the FBI] and the resulting swap. He has built his regime on ending the humiliation of the 1990s and demonizing enemy spies and lionizing his own. The fact that Sergei Skripal was hunted down nearly eight years after the swap – and after technically being pardoned – suggests the anger has not gone away."<sup>14</sup> [Putin] told the *Financial Times* that treason is not only the "gravest crime possible" but also the "most despicable crime that one can imagine." He repeated twice to the journalists: "Traitors must be punished."<sup>15</sup> "With the Skripal operation, Putin appeared to have sent two bold messages: to the British and the West, that he saw no territorial limits to Russia's violent actions abroad; and to Russian dissidents and other critics, that they were not safe anywhere in the world."<sup>16</sup>

Chechens who oppose strongman Ramzan Kadyrov, a close Putin ally, have been shot with impunity in Istanbul, Dubai, France, and Moscow.<sup>17</sup>

Given past events and Putin's expressions of intent, there are several potential targets in the West for his assassination squads. One is Mikhail Khodorkovsky, a constant critic of Putin. Also, given Putin's "gravest possible crime" comment, any past defector from the Russian intelligence services is a possibility.<sup>18</sup> Even former British SIS officer, Christopher Steele, after publication of the "Steele Dossier," reportedly went into hiding concerned about possible Russian retaliation.

The August 20, 2020 poisoning of Russian dissident Alexei Navalny on a flight from Tomsk to Moscow with a derivative of Novichok, the same substance used in the attempted assassination of former GRU officer Sergei Skripal in the UK in 2018, shows that Putin has few constraints when it comes to opponents and sends a message to others that they are not safe.<sup>19</sup>

## “Black Cash”

Black Cash are funds that have been siphoned off from Russian government contracts or from oligarchs by the SVR, Russia’s foreign intelligence service. The funds, much of which are laundered through tax havens, such as Cyprus, Panama, and Switzerland, are used for bribery, influence operations, and other “active measures,” including assassinations, around the world.

According to Belton, “black cash” payments have been made to:

- The National Front in France and its principal, Marine Le Pen, during France’s national election.
- France’s oil company, Total, which later called for the lifting of sanctions on Russia.
- The far-right Jobbik party in Hungary. Its leader, Béla Kovács, was later investigated for being a Russian agent.
- Viktor Orbán, Hungary’s president, who is also seen as pro-Putin, blocked the inquiry.
- The right-wing Lega Nord party and Five Star Movement in Italy.
- The left-wing Syriza party in Greece, which took power in 2015.
- Die Linke, a new leftist party established in 2007, in Germany.
- Austria’s right-wing Freedom Party. Russian interests bought Austria’s biggest newspaper, *Kronen Zeitung*.
- Bulgaria’s right-wing Ataka party.
- The election campaign of Miloš Zeman’s party in the Czech Republic. He was elected president in 2013.
- Gerhard Schroeder, former German chancellor, who was rewarded with a seat on the board of the Nord Stream company building a gas pipeline from Russia to Germany.

According to other sources, black cash is likely to have funded various active measures, including the anti-US group, The Base, in Russia; the Yellow Vest demonstrators in France; anti-EU elements in the UK prior to the Brexit vote; the 2014 Scottish independence referendum; the 2006 attempted coup d’état in Montenegro; and assorted cyber disinformation and influence activities aimed at the US, Germany, France, the UK, Moldova, Madagascar, and international organizations, such as the World Anti-Doping Agency and the Organization for the Prohibition of Chemical Weapons.

Assassination is part of the Russian intelligence heritage. It always has been and is seen as a very important role.<sup>20</sup>

## Active Measures

In line with Putin’s zero-sum philosophy, Russian “active measures” includes interfering with other countries by disseminating propaganda, spreading false news, conducting influence operations, interfering with democratic elections, funding Russia-friendly parties, corrupting officials, and other means. It also includes sub rosa hybrid warfare, such as the seizure of Crimea and support to separatist elements in Ukraine, Moldova, and Montenegro.

Since Putin came to power in 2000, Russia has used economic leverage to “force a change in policy” or undermine governments in at least 19 European countries, Laura Rosenberger, a former National Security Council official under Obama, told a House committee in May 2018.<sup>21</sup>

As the KGB funded terrorist groups during the Soviet period, Putin’s regime continues the tradition. The Imperial Legion is the armed wing of the Russian Imperial Movement. It has trained “volunteers,” who then joined Russian-backed separatists in the Donbass area of Ukraine.<sup>22</sup> Better known, although not categorized as a terrorist group, is the Wagner Group, which is supporting Libyan rebel Khalifa Haftar since 2018. In the 2020 Battle for Tripoli, it was estimated that the Wagner Group provided between 800 and 1,200 mercenaries.<sup>23</sup> It provided aid to Syria’s Assad as early as 2013, two years before Russian forces entered the scene.<sup>24</sup> It also is active in Sudan and the Central African Republic where it is linked to the assassination of three Russian journalists.<sup>25</sup> The Wagner Group feeds off of the GRU’s Spetznaz (special operations) forces. In 2015, it set up a training base, opposite a compound occupied by the 10th GRU special forces brigade. Recruits to Wagner poured in: the money was good and the recruits, paid \$1,000 a week during

Many right-wing, extremist, and paramilitary groups in the West receive both “financial and moral support from Moscow, which backs ‘dark money’ operations that promote narrow oligarchic interests... and far-right political parties in Europe with the hope of weakening democratic governments and cultivating future allies.” This includes groups in Italy, France, US, and elsewhere.<sup>27</sup> [See “Black Cash” sidebar on previous page.]

One example is “The Base,” formed in the summer of 2018, which seeks to overthrow the United States government and establish “a white ethno-state,” according to the FBI. Led by Rinaldo Nazzaro, from New Jersey, The Base is believed to have recruited dozens of members who have been given paramilitary and counter-surveillance training.<sup>28</sup>

### Disinformation

The Kremlin’s extensive disinformation campaign is intended to spread discontent, chaos, deceive audiences, and undermine the legitimate institutions in Western countries. The Kremlin’s audience for open disinformation is surprisingly large. The YouTube videos of RT (formerly Russia Today), Russia’s global television network, average one million views per day, “the highest among news outlets.” Since the founding of the Russian network in 2005, its videos have received more than four billion views.<sup>29</sup> Moscow also controls publishing entities outside of Russia. Measured in terms of views and subscribers, The Soul Publishing had the third-largest reach of any group of entertainment channels on YouTube in November 2019 – outranked only by Disney and WarnerMedia. It is run by Russian nationals, based in and managed from Cyprus, with U.S. operations in New York. In 2018, it purchased Facebook advertisements targeting U.S. citizens on political issues – and made those purchases in rubles. It also posts history videos with a strong political tinge. Many are overtly pro-Russian.<sup>30</sup>

## Solzhenitsyn Poisoning

social media outlets during the 2016 U.S. presidential election and the 2018 mid-term elections. While the IRA is well known, Russia also uses other channels for disinformation that are not so obvious.<sup>31</sup>

Senate Intelligence Committee member, Senator Angus King, has said: “The Soviet Union used disinformation for 70 years. This is nothing new. Vladimir Putin is a former KGB agent. He is trained in deception. This is his stock and trade and he is doing it well.”<sup>32</sup>

### Influence Operations

Former Australian Prime Minister Malcolm Turnbull, defined “malign” influence activities as covert, coercive, or corrupting.<sup>33</sup> The Kremlin’s influence operations are malign. Both the Mueller Report and the Senate Intelligence Committee Report detailed Russian influence operations, using disinformation via cyber hacking, leaks, social media, trolls, and other means.<sup>34</sup>

In the UK, the Parliamentary Intelligence and Security Committee’s investigation reported that Moscow built up a network of friendly British diplomats, lawyers, parliamentarians, and other influencers from across the political spectrum. The inquiry

## Fiona Hill Poisoning

Russian expert Fiona Hill, in 2003 a Brookings scholar, spent time with Chechen rebels exploring ways for reconciliation with Moscow. “Hill became violently ill after taking a sip of a drink at her hotel bar. An analysis of her blood showed that her liver enzymes were elevated, and she concluded that she had been poisoned.”

Hill later was senior director for European and Russian Affairs on the National Security Council in the White House.

raised politically awkward questions about the validity of the 2016 Brexit referendum and whether alleged Russian connections to the ruling Conservative party and black cash contributions influenced the vote.<sup>35</sup> The report also noted Russian interference in the Scottish independence referendum in 2014. The report stated that Russian agents were targeting staff support positions in the House of Commons, acquiring British citizenship to funnel cash to political parties, and employing public relations firms to sanitize reputations. The ISC reported there are a lot of Russians with very close links to Putin who are well integrated into the UK business and social scene, and accepted because of their wealth. This level of integration – in ‘Londongrad’<sup>36</sup> in particular – it is widely recognized that Russian intelligence and business are completely intertwined.<sup>37</sup>

## Corruption

The link between corruption and influence operations is a tight one. Putin’s Russia has transformed corruption into an instrument of national strategy, weaponizing it as an important form of political warfare. As the Soviet Union began to disintegrate in the 1990s, prosperous countries such as Canada, the UK,

and the US were seen as preferred shelters for the billions of dollars laundered through anonymized companies, real estate investments, and other schemes.<sup>38</sup> The Kremlin developed a pattern of malign economic influence in Europe through the cultivation of “an opaque network of patronage across the region that it uses to influence and direct decision-making.” The aim is to weaken and destroy democratic systems from within.<sup>39</sup> Other countries targeted include France, Germany, Austria, Bulgaria, Italy, Hungary, Malta, Panama, and Madagascar. In the 2018 Malagasy presidential campaign a “systematic and coordinated operation” led by a group of Russian businessmen with ties to the Kremlin helped Andry Rajoelina get elected. Since his election, Rajoelina has promoted closer ties with Russia.<sup>40</sup>

The UK welcomed Russian money, and few questions – if any – were asked about the provenance of this considerable wealth.<sup>41</sup> The ISC report called it the London ‘laundromat.’ The money extended patronage and built influence across the British establishment – PR firms, charities, political interests, academia and cultural institutions were all willing beneficiaries of Russian largesse. Thousands of Russian-linked shell companies were used to launder black cash linked to organized crime. The United Kingdom’s anonymous property registry allowed Russian oligarchs to swamp London and its financial sector, where they stashed dirty money.<sup>42</sup> Moscow was emboldened by the British governments’ failures to take a tougher stance after a former Russian spy, Alexander Litvinenko, was fatally poisoned in 2006.<sup>43</sup>

In the U.S., Putin-friendly oligarch Oleg Deripaska,<sup>44</sup> head of Rusal, the second largest aluminum producer in the world, proposed investing millions into a new aluminum plant in Ashland, Kentucky. He had been sanctioned by the U.S.<sup>45</sup> Mitch McConnell,

Since [the Cold War], Russian intelligence has interfered in many foreign elections, not to advance an ideology but to promote divisive and authoritarian-minded candidates, sow chaos and confusion, and delegitimize the democratic model.<sup>47</sup> Targeted countries include, inter alia, Poland, Ukraine, Moldova, Montenegro, Czech Republic, Hungary, Germany, France, UK, Madagascar, and the US.<sup>48</sup>

### Cyberattacks

The employment of hard-to-attribute cyberattacks against adversaries has become a mainstay of Russian aggressive malign activities. They support disinformation operations, influence operations, corruption, sabotage and other active measures. The Center for Strategic and International Studies maintains an extensive listing of “Significant Cyber Incidents.”<sup>49</sup> These include denial of service attacks, hacking,<sup>50</sup> covert surveillance and persecution of dissidents, implantation of malware, and destruction of digital systems. One of the most destructive Russian cyberattacks was the 2017 NotPetya malware that spread worldwide, infected millions of computers, and caused havoc for businesses and governments.<sup>51</sup>

### Sabotage

The employment of cyberattacks for physical sabotage has been used against Russia’s adversaries. Ukraine has been a primary target since the seizure of Crimea and “rebellion” in the Luhansk and Donbass regions adjacent to Russia. Probably the most significant use of cyber malware for sabotage occurred in December 2015 when a Russian cyberattack disabled the Ukrainian power grid. Subsequent analysis determined that the intent of the malware (which failed) was to cause physical destruction of the power grid when it was turned back on. It was seen as a test of cyberwarfare tactics.<sup>53</sup>

Questions remain concerning the April 2010 crash of the Polish presidential plane at Smolensk, Russia, which killed many of the leaders of Poland’s anti-Russian government, when they were traveling to a commemoration of the 1940 Katyn massacre by Stalin’s NKVD of an estimated 22,000 Polish military officers and intelligentsia.<sup>54</sup> Some maintain that it was a mass assassination of the leaders of a hostile Polish government.

Allegations of Russia offering bounties for American soldiers in Afghanistan have been based on prisoner interrogations and analysis of cash flow from a GRU-associated bank account to a Taliban account.<sup>55</sup> The allegations point to payments to criminal elements, who are commissioned to carry out attacks, via the hawala financial system.<sup>56</sup>

Russia’s GRU (military intelligence) has established dedicated units to carry out its hybrid warfare active measures. GRU Units 26165, 29155, and 74455 have been linked to the seizure of Crimea, the desta-

## Conclusions

On January 27, 2018, Putin became the longest-serving leader of Russia since Joseph Stalin. In an interview with the *Financial Times*, asked which world leader he admired most, Putin answered "Peter the Great." Putin has, in fact, styled himself as a tsar as much as a Soviet general secretary over the course of his two decades in public life.<sup>58</sup> A Duma bill passed in March 2020 will enable Putin to remain in power until 2036, longer than Stalin.<sup>59</sup> Putin has certainly given up

any aspiration of rebuilding or normalizing relations with the West, according to Robert Dannenberg, a former senior CIA official.<sup>60</sup>

While Russia and many of its officials and Putin-associated oligarchs have been sanctioned by the U.S. and Western European countries, Putin has suffered little pain for the most sinister of his international operations: the pandemic of murders of defecting spies and other exiled opponents.<sup>61</sup> Putin has overseen a state version of убийство включено – Murder, Incorporated.

Fifty years from now historians will look back and conclude the Cold War did not end with the 1991 dissolution of the Soviet Union. It just took a breather – that lasted almost a decade. By 1999, it returned with Vladimir Putin's accession as Russian prime minister and then president.

## APPENDIX: RUSSIAN-LINKED ASSASSINATIONS AND ATTEMPTS UNDER PUTIN<sup>1</sup>

EVENT	DESCRIPTION	SOURCE
<b>Threat of Assassination</b> <b>Marina Salye</b> St. Petersburg 1991 – 2000	A reformer and political opponent of St. Petersburg Mayor Sobchak, who relentlessly investigated corruption regarding export quotas under Putin's control that he awarded to front companies, which were part of the KGB's slush funds scheme. Blocked by Sobchak from investigating further, she later published a report "V. Putin – The President of a Corrupt Oligarchy." Under threat of possible assassination, Salye self-exiled to a remote area near the Finnish border.	Catherine Belton, <i>Putin's People: How the KGB Took Back Russia and Then Took on the West</i> . New York: Farrar, Straus and Giroux, 2020, p. 87-92, 94-5.
<b>Assassinations ???</b> <b>Sons of Ryszard Kuklinski</b> Florida 1993 – 1994	Polish General Staff colonel and prolific CIA spy (1972-1981) exfiltrated with family out of Warsaw and resettled in Florida. Sentenced to death in absentia. Within months both sons died mysteriously – one while boating (Dec. 1993), the other in a hit and run (Aug. 1994). The car was found torched. Neither case was ever resolved.	"The Dangerous Business of Exfiltrating Spies – Part Two." <i>The Cipher Brief</i> , Sep. 18, 2019. A conversation with Joseph Augustyn, chief of CIA's Defector Operations Center.
<b>Assassinated</b> <b>Mikhail Manevich</b> St. Petersburg Aug. 18, 1997	Chief of St. Petersburg city property department, he tried to regain control of the port for the city government that had been taken over by criminals in league with Putin's position as deputy mayor. Shot dead by a sniper while driving to work. Yury Shutov was blamed (see below). Murder never solved.	Catherine Belton, <i>Putin's People</i> , p.104.
<b>Assassinated</b> <b>Galina Starovoitova</b> St. Petersburg Nov. 20, 1998	A believer in democracy and crusader against corruption, Starovoitova, a Duma member, was gunned down in her apartment building's stairwell. The investigation determined the murder was organized by a former GRU hitman. She had pushed legislation for lustration (the purging of officials) and opposed the power of the KGB.	Catherine Belton, <i>Putin's People</i> , p.113. Helen Womack, "Obituaries: Galina Starovoitova," <i>Independent</i> , 23 Nov. 1998.
<b>Assassinated</b> <b>Yury Shutov</b> St. Petersburg 1998	Fired former Sobchak aide and enemy of Putin was arrested in 1998 on trumped up murder charges of killing Galina Starovoitova. Also accused of murdering Mikhail Manevich. Shutov died on Dec. 12, 2014 in the White Swan maximal security prison. "The many secrets he'd dug up on Putin as deputy mayor disappeared with him forever."	Catherine Belton, <i>Putin's People</i> , p. 519, footnote 42.
<b>Assassinated</b> <b>Anatoly Sobchak</b> St. Petersburg Feb. 19, 2000	Former mayor of St. Petersburg and Putin's boss. Had left Russia but returned and wrote article critical of KGB in St. Petersburg. Reported "heart attack" but probably poisoned by his KGB-associated security guard. Investigation closed without official finding.	Catherine Belton, <i>Putin's People</i> , p. 104, 170, 171-3.
<b>Multiple Assassinations</b> <b>Yamadaye Brothers</b> Moscow & Dubai 2003, Sep. 2008, & Mar. 2009	Former Duma member and an enemy of Chechnya's pro-Putin president, Ramzan Kadyrov, Ruslan Yamadayev was gunned down outside the British embassy in Sep. 2008. His brother, Sulim, a Chechen commander in the first Chechen War also opposed to Kadyrov, was shot dead in Dubai in Mar. 2009. Previously, Dzhabrail was assassinated by a bomb in 2003.	Luke Harding and Miriam Elder, "Attack on Russian banker in London leaves trail of clues back to Moscow," <i>The Guardian</i> , 30 Mar. 2012.

1. This Appendix is an expanded version and supplants Table 1, Significant Murders or Attacks Related to Putin's Regime, in Oleson, "Wet Affairs," Part II." This Appendix is by no means comprehensive. Various sources list many others who may have died unnaturally, but details are scarce and the reliability of reports uncertain. It is challenging from open sources to determine with high confidence the cause of death in some cases, related circumstances, or motives. Given the secrecy of Russian authorities in most investigations, reporting of the cause of death is unreliable and inevitably slanted to preclude criticism of the regime and, therefore, cannot be taken at face value. While readers might question the inclusion of some of the entries in this Appendix and might wonder whether a listed "heart attack" was natural or induced, the sheer number of suspicious deaths of opponents of the Putin regime has to give pause and leads to the conclusion that "wet affairs" – assassinations – have become a much-used instrument of the Russian state.

6. GCHQ (Government Communications Headquarters) is the British signals intelligence organization. MI6 is the designation for the British Secret Intelligence Service. GCHQ and the US National Security Agency are two parts of the "five eyes" international signals intelligence alliance, also comprising Canada, Australia, and New Zealand.

7. According to *The Telegraph*, "the US State Department asked MI6 to ensure that no details of Mr. Williams's work should emerge at the inquest of his death." (<http://www.telegraph.co.uk/news/uknews/crime/9218325/Secret-meeting-between-MI6-and-police-hours-after-discovery-of-spy-Gareth-Williams-death.html>.) There are a number of theories about Williams' death. One reported by *The Independent* is that he refused to become a double agent for the SVR when it attempted to blackmail him and the SVR killed him to protect the identity of one of its penetration agents. ([www.independent.co.uk/news/uk/home-news/mi6-spy-gareth-williams-was-killed-by-russia-for-refusing-to-become-double-agent-former-kgb-man-a6670196.html](http://www.independent.co.uk/news/uk/home-news/mi6-spy-gareth-williams-was-killed-by-russia-for-refusing-to-become-double-agent-former-kgb-man-a6670196.html)) KGB defector Boris Karpichkov also told a UK tabloid that Williams was killed to protect a SVR mole within MI-6 codenamed ORION about whom Williams had become suspicious. An attempt to recruit Williams failed, so he was killed. Karpichkov defected to the UK in 1998 with two suitcases of documents. He claimed there have been three attempts on his life using poison since 2006.
